EDUCATION

Institute of Engineering and Technology, Lucknow **2021 - 2025**
Bachelor of Technology - Computer Science and Engineering (AI) - CGPA - 7.89 *Lucknow, Uttar Pradesh*

EXPERIENCE

Kotech Solutions (Callease.ai) **March 2025 - Current**
MERN Stack Developer *Full Time*

Technologies: NextJs, JavaScript, NodeJs, MaterialUI, AWS Lambda, SQS, CloudWatch

- Serverless Campaign Architecture: Reengineered the campaign execution workflow using AWS Lambda to enable concurrent outbound calling, improving scalability
- AWS Integration: Utilized AWS SQS for asynchronous task processing and CloudWatch for monitoring and troubleshooting serverless campaign execution.
- Contributed to multiple voice AI projects, developing frontend interfaces and backend APIs, integrating services, and implementing features across the application.

Nasya Software Technologies **Jan 2025 - March 2025**
Full Stack Developer *Intern*

Technologies: ReactJs, JavaScript, NodeJs, MaterialUI, Python Flask

- Ensured application reliability with Postman API testing and seamless deployment.
- Implemented debouncing in search functionality, reducing API call costs by 60 Percent and improving performance.

Ricoz Private Limited **Nov 2023 - May 2024**
ReactJs Frontend Developer *Intern*

- Developed a courier service website MyFaxtX from scratch: Featuring Customer, Partner, Admin section and applied RESTful APIs to facilitate seamless data exchange between frontend and backend systems.
- Implemented optimized SEO, authentication using JWT for secure session management, state management with Redux Toolkit and enhancing performance by 40 percent

SKILLS SUMMARY

Languages and Tools	C/C++, JavaScript, SQL, Postman, GitHub, Python, AWS Lambda, SQS, CloudWatch, Redis, SEO, AEO
Coursework	OOPS, OS, DBMS, ML, AI
Database	MongoDB, MySQL
Frameworks and Library	ReactJs, NextJs, NodeJs, Redux, ExpressJs, Tailwind
Soft Skills	Problem solving, Teamwork, Time management

PROJECTS

Folionce - White-Label Portfolio Builder

- Built a multi-tenant SaaS platform where users create, customize, and publish their own portfolio at a custom URL, using Next.js, React, Tailwind CSS, Node.js, Express, MongoDB, and Redis.
- Implemented secure authentication with email OTP verification, optional TOTP two-factor login with backup codes, rotating refresh tokens with reuse detection, step-up re-authentication for sensitive actions, and per-IP rate limiting.
- Integrated Razorpay subscription billing with signature-verified webhooks that gate publishing, plus direct-to-S3 image uploads via presigned URLs with an in-browser crop and filter editor.

cBot - AI Agent SaaS Platform

- Built a full-stack, multi-tenant AI Agent SaaS platform from the ground up, enabling organizations to create AI agents, connect knowledge bases, and deploy them through embeddable chat widgets or REST APIs.
- Engineered a hybrid RAG pipeline using PostgreSQL pgvector (HNSW), full-text search, and Reciprocal Rank Fusion (RRF), integrating multiple LLM providers and SSE-based response streaming with p95 Time to First Token (TTFT) under 2.5 seconds.
- Validated system performance with load tests supporting 1,000 concurrent streaming users; established 173 test files, 7 Prometheus SLO alerts with runbooks, and CI/CD pipelines with 12 automated quality gates.
